SUBJECT INDEX

ab-initio calculations 115
absorption 741
– two-photon 517, 519
ACEL in ZnS:Er^{3+} 788
active surface sites 829
adiabatic potential barrier 455
afterglow 169
aggregates 645
aggregation 260, 387
alloying 127
amorphous
– carbon films 905
– semiconductors 559
– solids 84
amplified spontaneous emission 821
annealing 357
anomalous diffusion 641
antenna pigment 47
anthracenes 278
attenuation length 244
Auger effect 589

band structure 913
binding energy 469
bioluminescence 225, 825
bipolaron 294, 501
blue electroluminescence 861
blue emission 331
borate glass 657
bound exciton 59, 147, 337, 665
– complexes 433

calcified atherosclerotic lesions 215
cathodoluminescence 121, 361, 865, 879
Ce(3 +) activated 163
changes in the charge states of Ni and Cu ions 311
characteristics of TL 881
charge
– compensation 387
– compensation sites 301
– states 403
– transfer 254, 885
chemically mixed crystal 645
chemiluminescence 256, 258, 840
– analysis 844
– mechanism 842
circular polarization 227
circularly polarized luminescence 268
cluster energy 413
cluster expansion 605
codoped polyaluminate 661
coherence time 529
coherent transients 3
collective spontaneous emission of coherent light 541
color centers 319
color electroluminescence 20
complex defects 59, 337
concentration quenching 639, 836
continuous-time random walks 80
contrast in EL 779
cooperative excitation 507
coordinate solvent mode 43
correlation 553
counting rate 831
cross relaxation 601, 657
crystal 377, 749, 869
– field 111
– slab 617
curve fitting 808

D–A pairs 123, 747
4d–4f giant resonance 696
d–f radiative transition probabilities of Pr ion 159
damage 389
damping dispersion 499
DCEL 777
decay times 292
deep center 357, 375, 597
deep defect 335
deep electron traps 333
deep level 327, 329, 361, 365, 371, 802
deep states 417
defect 341
– luminescence 343
degenerate four-wave mixing 547
degradation 810
delayed fluorescence 280
desorption 427
dibenzylsulfoxide 290
dimensionality 471
dimer 619
diode 861
– laser pumping 509
– ZnS and ZnSe 767
dislocation 361
disorder 425
dispersed silver particles 133
dispersive transport 191
